Education

Cornell University, College of Engineering

B.S. in Computer Science

GPA: 3.54

Ithaca, NY

Expected Graduation May 2028

Stuyvesant High School

Stuyvesant Endorsed Regents Diploma with Honors

GPA: 4.0

New York, NY

Graduated June 2025

Coursework: Data Structures & Algorithms, Linear Algebra, Discrete Mathematics, Introduction to Operations Research

Technical Skills and Awards

Skills: Python, Java, TensorFlow, PyTorch, Hugging Face, React, Next.js, Node.js, Express.js, Supabase, SQL, Linux

Awards: [Congressional App Challenge Winner](#), [Hormel Foods 10 Under 20 Food Hero](#), Calvin Martin Memorial Scholar

Work Experience

Ascend Capital Group

05/26 - Present

AI Engineer Intern

Remote

- Automated booking intake with **LangChain** agent with **quantized Llama 3**, **AWS EC2** via **Docker**, and **CI/CD**
- Built **FastAPI webhook receiver** ingesting Gmail and Squarespace bookings into **AWS RDS PostgreSQL**
- Reduced booking processing time by **95%** automating multi-channel intake across Gmail and Squarespace

ASCEND @ LinkedIn

10/25 - Present

Software Engineer Intern

Ithaca, NY

- Built real-time **PII detection** pipeline (**Presidio**, **Claude API**) achieving **97% precision** across **5 risk categories**
- Designed **PostgreSQL** schema and **FastAPI** REST endpoints to log, retrieve, and serve prompt-level risk events
- Engineered role-based risk classifier **reducing false positives by 60%** across **3 employee permission tiers**

Cornell Hack4Impact Project Team

08/25 - Present

Developer

Ithaca, NY

- Worked in a team of 8 to build a cross-chapter [Hack4Impact member portal](#) in **React**, **Express.js**, and **Supabase**
- Enabled **800+ volunteers** across **13 chapters** to connect with alumni and track past and present projects
- Collaborated with Hack4Impact's national board to define platform features aligned with organizational goals

Food for All NYC (foodforallnyc.org)

09/21 - Present

Founder and CTO

New York, NY

- Directed students in school food rescue initiatives, donating over **10,000 lbs** of food, approximately **8,300 meals**
- Collaborated with city officials to enact **policy changes** that enabled schools **city-wide** to save surplus food
- Secured over **\$20,000** in monetary donations from the Drew Barrymore Show, Conagra, and Hormel Foods

Projects

Vitalink | Palantir Foundry, AIP Logic, Python

04/26

- Built **AI-powered coordination tool** identifying blood shortages and expiring inventory in rural hospital network
- Designed **semantic ontology** modeling hospitals, blood inventory, and transfers for **live network-wide visibility**
- Engineered **AIP Logic agent** to surface prioritized transfer recommendations across expiration and shortage risks

Latent Backdoors in Transformers | Python, Hugging Face, Scikit-learn, PyTorch

01/26

- [Fine-tuned BERT](#) with **Hugging Face** across **6 poisoning rates**, achieving attack success rates up to **98.5%**
- Created **PCA visualization** with **Scikit-learn** to quantify poisoned embedding movement to target class centroids
- Engineered steering vector to flip **98%** of clean labels, uncovering trigger-independent backdoor representations

RAG Context Compression | Python, FAISS, Hugging Face, PyTorch

12/25

- Built an [end-to-end RAG pipeline](#) with **FAISS-based retrieval** and **DistilBART** abstractive context compression
- Compared system prompting strategies across **3 RAG setups** to study hallucination vs correctness trade-offs
- Created [interactive Streamlit interface](#) visualizing retrieval relevance, compression effects, and grounded outputs
