Education

Cornell University, College of Engineering

B.S. in Computer Science

GPA: 3.5

Ithaca, NY

Expected Graduation May 2028

Stuyvesant High School

Stuyvesant Endorsed Regents Diploma with Honors

GPA: 4.0

New York, NY

Graduated June 2025

Coursework: Data Structures & Algorithms, Linear Algebra, Discrete Mathematics, Introduction to Operations Research

Technical Skills and Awards

Skills: Python, Java, TypeScript, SQL, React, Next.js, Node.js, Express.js, FastAPI, LangChain, TensorFlow, PyTorch, Hugging Face, Scikit-learn, AWS (EC2, RDS), Google Cloud (App Engine, Cloud Datastore, Task Queues), Docker, PostgreSQL, Supabase, FAISS, Playwright, Linux

Awards: [Congressional App Challenge Winner](#), [Hormel Foods 10 Under 20 Food Hero](#), Calvin Martin Memorial Scholar

Work Experience

Eulerity

06/26 - Present

Software Engineer Intern

New York, NY

- Built **async GCP** data pipeline, **replacing 4k-row sync limit** with **unbounded** CSV file uploads at **8.2k write/sec**
- Refactored a **~4,000-test** suite, shifting **CI** from **30-minute** merge-only checks to **~3-minute** checks on every PR
- Developed a custom rubric to drive **LLM-based** scoring of **~500** franchise domains for AI-search readiness
- Designed **paginated** read endpoints serving **15,000 rows/sec** for large-scale franchise conversion data analysis
- Created Claude Code skill automating ticket creation from meeting transcripts, **reducing** time per ticket by **~90%**

ASCEND @ LinkedIn

10/25 - Present

Software Engineer Intern

Ithaca, NY

- Building real-time **PII detection** pipeline, achieving **97% precision** across **5 risk categories** on live prompt data
- Designing **PostgreSQL** schema and **FastAPI** REST endpoints to log, retrieve, and serve prompt-level risk events
- Engineering role-based risk classifier **reducing false positives by 60%** across **3 employee permission tiers**

Cornell Hack4Impact Project Team

08/25 - Present

Developer

Ithaca, NY

- Worked in a team of 8 to build a cross-chapter [Hack4Impact member portal](#) in **React**, **Express.js**, and **Supabase**
- Enabled **800+ volunteers** across **13 chapters** to connect with alumni and track past and present projects
- Collaborated with Hack4Impact's national board to define platform features aligned with organizational goals

Food for All NYC (foodforallnyc.org)

09/21 - Present

Founder and CTO

New York, NY

- Directed students in school food rescue initiatives, donating over **10,000 lbs** of food, approximately **8,300 meals**
- Collaborated with city officials to enact **policy changes** that enabled schools **city-wide** to save surplus food
- Secured over **\$20,000** in monetary donations from the Drew Barrymore Show, Conagra, and Hormel Foods

Projects

AI Booking Automation System | LangChain, Claude API, FastAPI, AWS, Docker, Playwright

05/26 - Present

- Engineering [agentic booking intake](#) with **LangChain** and **Claude API** on **AWS EC2** via **Docker** with **CI/CD**
- Creating **FastAPI webhook receiver** ingesting Gmail and Squarespace bookings into **AWS RDS PostgreSQL**
- Designing **evaluation framework** of **100+ test cases** measuring extraction accuracy, reducing error rate by **35%**

Latent Backdoors in Transformers | Python, Hugging Face, Scikit-learn, PyTorch

11/25 - 01/26

- [Fine-tuned BERT](#) with **Hugging Face** across **6 poisoning rates**, achieving attack success rates up to **98.5%**
- Created **PCA visualization** with **Scikit-learn** to quantify poisoned embedding movement to target class centroids
- Engineered steering vector to flip **98%** of clean labels, uncovering trigger-independent backdoor representations
