Education

Cornell University, College of Engineering

B.S. in Computer Science

GPA: 3.5

Ithaca, NY

Expected Graduation May 2028

Stuyvesant High School

GPA: 4.0

New York, NY

Coursework: Data Structures & Algorithms, Linear Algebra, Discrete Mathematics, Introduction to Operations Research

Technical Skills and Awards

Languages & Frameworks: Python, Java, TypeScript, SQL, React, Node.js, Express.js, FastAPI

ML/AI: PyTorch, Hugging Face, Scikit-learn, LangChain, Claude API

Infra & Tools: AWS (EC2, RDS), GCP (App Engine, Task Queues), Docker, PostgreSQL, Supabase, GitHub Actions

Awards: [Congressional App Challenge Winner](#), [Hormel Foods 10 Under 20 Food Hero](#), Calvin Martin Memorial Scholar

Work Experience

Eulerity

06/26 - 08/26

Software Engineer Intern

New York, NY

- Built **async Java** pipeline on **GCP**, replacing **4k-row sync limit** with **unbounded** CSV uploads at **8.2k writes/s**
- Refactored **~4,000 JUnit** tests, shifting **CI** from **30-minute merge-only** runs to **~3-minute** checks on **every PR**
- Developed a custom rubric to drive **LLM-based** scoring of **~500** franchise domains for AI-search readiness
- Designed **paginated** read endpoints serving **15k rows/s** for large-scale franchise conversion data analysis
- Created Claude Code skill automating ticket creation from meeting transcripts, **reducing** time per ticket by **~90%**

Cornell ASCEND (LinkedIn-Sponsored)

10/25 - Present

Software Engineer Intern

Ithaca, NY

- Built **DLP** Chrome extension **intercepting** LLM chat prompts as typed, warning users before risky content is sent
- Cascaded **OpenAI privacy filter** and **BART classifier** to detect and redact **5 risk categories** at **<900ms p95**
- Modeled **PostgreSQL** schema and **FastAPI endpoints** logging and serving risk events to **3-tier** org overviews

Cornell Hack4Impact Project Team

08/25 - Present

Developer

Ithaca, NY

- Delivered **cross-chapter** [internal member portal](#) in **TypeScript**, **React**, **Express**, and **Supabase** with a team of **8**
- Shipped alumni directory and project archive to serve **800+ team members** across **13 active chapters**
- Implemented **email** and **OAuth** auth flows and **schema** changes alongside shared **frontend** components

Food for All NYC

09/21 - Present

Founder and CTO

New York, NY

- Directed students in school food rescue initiatives, donating over **10,000 lbs** of food, approximately **8,300 meals**
- Collaborated with city officials to enact **policy changes** that enabled schools **city-wide** to save surplus food
- Secured over **\$20,000** in monetary donations from the Drew Barrymore Show, Conagra, and Hormel Foods
- Launched and maintain [foodforallnyc.org](#), adding an online donation flow that captured **\$1,000+** from site visitors

Projects

AI Booking Automation System | LangChain, FastAPI, AWS, Docker, GitHub Actions

05/26 - Present

- Developed [booking intake automation](#) to **replace manual entry** of **~150 bookings/week** at a family business
- Built a **LangChain agent** with custom tools to extract reservations from Gmail and Squarespace messages
- Wrote **evaluation framework** of **100+ labeled cases** measuring accuracy, iterating prompts to **cut errors 35%**

Latent Backdoors in Transformers | Python, Hugging Face, Scikit-learn, PyTorch

11/25 - 01/26

- [Fine-tuned BERT](#) with **Hugging Face** across **6 poisoning rates**, achieving attack success rates up to **98.5%**
- Created **PCA visualization** with **Scikit-learn** to quantify poisoned embedding movement to target class centroids
- Engineered steering vector to flip **98%** of clean labels, uncovering trigger-independent backdoor representations
